

### E glass narrow tapes

The woven tapes are 300 mm or less in width. They are made of one or several folds.

They are woven from yarns without any metal strengtheners.

#### Applications

- Protection against heat
- Covers for pipes and cables
- Screens and curtains
- Heat insulation for pipes
- Various seals for mechanical and boiler work applications
- Low pressure door seals

... / ...

#### Thermal properties

710°C: E glass melting

#### Chemical properties

<u>Resistance</u>	<u>E glass</u>
Acid:	medium
Base:	medium
Solvent:	good

#### Physical properties

	<u>E glass</u>
UV resistance:	good
Dielectric strength:	good

#### Product specifications (example of some dimensions)

<u>Width</u>	<u>Thickness</u>	<u>Weight / meter</u>
7 mm	3,0 mm	+/- 15 g/m
10mm	1,2 mm	+/- 10 g/m
10 mm	2,5 mm	+/- 22 g/m
15 mm	1,2 mm	+/- 15 g/m

Available from 7 to 300 mm width and from 1,2 to 5 mm thickness  
Other dimensions: please contact us  
Available dyed and/or adhesived
